Although coffee is mostly ground at roasters or grocery stores, grinding whole beans at home is one trend that has been prevalent, especially for those who are fond of preparing their own blend.

- In comparison to ground coffee, whole bean coffee accounts for a small share of consumption in U.S. Whole bean coffee requires extra effort for preparation which might be the reason for its lack of consumption growth.

- In 2006, India-based Tata Group’s coffee division, Tata Coffee Ltd., made its entry in the U.S. coffee market by acquiring Eight O’Clock Coffee, which is one of the leading retailers of whole bean coffee.

- In 2016, Eight O’Clock Coffee introduced a new roast/ground line called Infusions that combines coffee with functional ingredients in 10-ounce bags. Alert blends in caffeine and guarana and Relax is decaf coffee with chamomile and lavender. The brand conducted a 10-city sampling tour behind the line, as well as radio ads and TV spots. Tagline: “There’s a Reason Behind Every Sip.”

- In 2017, the company added three new Infusions: Super Spice, with turmeric and cinnamon; Acai Glow, with acai berry; and B6 Metabolism, containing a fruit and herbal blend. The latter two have since been discontinued.

- In 2018, Eight O’Clock Coffee ran an online game called “Great Coffee Break” that awarded eight grand prize winners a year’s worth of free groceries (valued at $8,000).

- Starbucks is another prominent whole bean brand. In 2017, whole bean accounted for % of coffee volume — down from % in 2012. Whole bean share is expected to remain at % by 2022.
