Global Beer Market – Trends and Headlines

Global Beer Headlines

- 1 The global beer industry in recent years has been slowed by annual declines by the top two consuming nations, China and the U.S.
- 2 Traditional markets, such as North America, remained flat in recent years while Asia has declined and Africa has seen a recent uptick in consumption.
- 3 While acquisition of SAB Miller by AB InBev in 2016 remains a highlight of recent years, the pace of consolidations in the beer industry continued, making the industry on a global level less fragmented.
- 4 With increased competition, tighter regulations and evolving consumer demographics, marketers are looking more towards innovation to gain incremental volume.
- 5 Declines in consumption can also be attributed to consumer preference toward craft beer and other beverage alcohol alternatives. Distilled spirits in particular have taken consumers away from the category.
