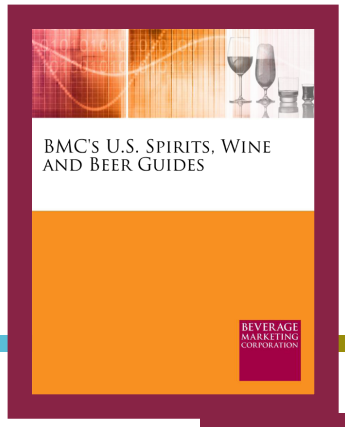
BMC's U.S. Spirits, Wine and Beer Guides

2020 Editions (To be published December 2020. Data through 2019. Market projections through 2024.) PowerPoint Presentations. Each features more than 75 slides, with extensive analysis, graphs, charts and tables + 600 Excel exhibits offering even greater detail!



From the industry leader in U.S. beverage market insights and intelligence these three Guides offer the most reliable data available on domestic spirits, wine, and beer consumption and sales. Each captures and analyzes historical shifts and current directions in these trend driven markets. Data are expertly placed in a context that enables business planners, analysts as well as sales and marketing executives to plan successful paths to market.

Key trends are presented in colorful PowerPoint presentations to make insights come alive. Discussion of market drivers, consumer trends and the impact of the coronavirus pandemic. Plus, you get more than 600 Excel exhibits providing in-depth data for a deeper dive on aspects covered in PowerPoint slides and much more.

The answers you need

- Three markets, driven by concentric circles of changing taste, demographics, and economic imperatives—what data is critical to help you plan in this complex environment?
- Are on- and off-premise trends similar or different for different beverage alcohol categories? Craft beer versus craft spirits, for instance?
- What about price tiers—does noise about premiumization compared to whispers about value brands reflect a changing market or just the hopes of certain marketers?
- What are the changing trends in new product introductions and how do these related to actual consumption and sales?
- As the importance of social media marketing continues to grow, does this favor the larger marketing entities or even the field for new entries and boutique suppliers?
- Does consumption data reveal anything useful about a product and brand focus versus a strategy of portfolio building?
- What does the advertising data reveal about company and brand strategy?
- Does expanding interest in new wine varieties and regions have meaningful parallels in the growth areas for spirits and beer?
- Flavor preferences continue to change—or, perhaps, evolve. When does it make sense to follow them and when is it simply chasing an evanescent fad?

BMC's U.S. Spirits, Wine and Beer Guides answer all these questions with both expert analysis and a comprehensive compendium of reliable, hard data.

These reports feature

Each Guide features data on the overall market volume by category, state, and top brands, a breakout of on- versus off-premise consumption by volume and sales, plus detailed listings of top brand sales by both price categories and beverage types. Fastest growing brands are featured. Plus, advertising, export/import data and extended projections. Data on craft beer sales, spirits flavors, and specialty products are all included.

Total market coverage with break-outs for key brands. Company and brand data provided for each report in this discounted three report set was as follows for the 2019 reports. Coverage may differ slightly in the 2020 editions:
