**The answers you need**

This brief but insightful market report discusses key issues in the RTD protein drinks category. It measures volume, as well as wholesale dollar sales. BMC’s exclusive five-year projections are also included. Questions answered include:

- How did RTD protein and meal replacement drinks originate and evolve in the U.S. market?
- Which are the leading brands? Is the market sewn up by big companies or is there room for smaller players to capture a significant percentage of market share?
- Why has the category been successful? Also, why has the category slowed down? How do RTD protein and meal replacement drinks relate to the rest of the better-for-you beverage market?
- How much is the RTD protein and meal replacement drink market expected to grow in the next five years? What are the tailwinds and headwinds going forward?

**This report features**

This report examines a unique niche of the wellness and functional beverage space that borders the sports beverage segment and is encompassed in the overall sports nutrition realm. The presentation of industry research begins with an overview of the RTD protein and meal replacement drink market, then analyzes various brands and the companies behind them. Innovations these brands have achieved and the marketing strategies behind them are analyzed.

After outlining this context, the report describes the issues likely to determine what is next in the U.S. RTD protein and meal replacement drink marketplace and projects market size five years into the future. In this report, readers get a thorough understanding of all facets of the RTD protein and meal replacement drink market including:

- Wholesale dollar sales and volume of the RTD protein and meal replacement drink market going back to 2015.
- Discussion of the main competitors and their likely prospects, including analysis of the strategies of the largest brands in the segment.
- Analysis of the prospects of the RTD protein and meal replacement drinks market in the next five years, with Beverage Marketing’s wholesale dollar and volume category projections to 2025.

Although traditionally protein drinks mainly were the narrow province of gym rats who purchased them in powder form, this changed dramatically over the past decade once the beverage world saw the explosive success awaiting the ready-to-drink version of powder-based Muscle Milk.

- This occurred after diets like Atkins, while discrediting carbohydrates, helped to make protein a buzzword in nutrition earlier in the 2000s. When giant Pepsi Bottling Group (PBG) forged a national distribution alliance with Muscle Milk over a decade ago, this was enough to legitimize the segment in the channel, and this was one alliance in which the bottling system does appear to have accorded a guest brand a reasonable amount of attention, even if took a while before PepsiCo was willing to fully integrate the brand via acquisition.

- The category has also drawn attention because of the efforts of major yogurt makers to position some of their drinkable lines as protein-rich meal replacements, although most contain barely two or three grams of protein per serving. And of course, as noted above, milk producers have joined the party.

- Not surprisingly the Pepsi alliance prompted a frenzy of activity as other entrants look to get their protein lines into the distributors who were dispossessed of their Muscle Milk. These included independent companies with roots in the supplement space, such as VPX (with Redline) and Labrada Lean Body, and the major pharmaceutical company Abbott Laboratories with EAS Myoplex. VPX has made some headway, but the others have generally faltered, unable to get their hands around an alien sector, mainstream retail, and the distributors used to reach it.

- Major food and beverage companies have been attracted to the segment for its robust shelf price and lack of overlap with their core items, but a pair stubbed their toes badly. Soft drink marketer DPS invested millions in 2007 in launching a RTD version of the powdered Accelerade brand to which it had obtained RTD rights, but found the effort ultimately undermined by positioning and production issues that caused it to pull the brand quickly.

- About a decade ago, Muscle Milk’s distribution partner, PepsiCo restaged its Gatorade sports drink brand to include a protein “recovery” drink, but that effort too sputtered.

- For their part, the breakfast cereal manufacturers also want in on a good thing and have launched their own protein-oriented beverage lines positioned as a grab-and-go breakfast alternative under names like BFast (from General Mills) and Special K2O without any noteworthy breakouts emerging.

- Even megabrewer Anheuser-Busch got in on the game, with an interesting twist: its Zx Ventures incubation arm helped launch a brand called Canvas that employed spent grains from the brewing process to make a protein-rich and emphatically plant-based beverage. But the effort sputtered out and founder Sarah Pool has proceeded on her own again, under the appropriately named Take Two Beverages.
