FOR A FULL CATALOG OF REPORTS AND DATABASES, GO TO bmcreports.com

This comprehensive ready-to-drink tea market report examines the U.S. tea market at a time when ongoing innovation and competition from within the category as well as from outside the sector make this a particularly important time to keep a close eye on the trends in the sector and its evolving sub-segments. This in-depth report focuses on RTD tea market trends (pre-packaged, bottled or canned tea). It provides statistics on regional markets as well as historical and current sales data for the leading companies and brands. Forecasts through 2027 are provided and impact of covid-19 is discussed.

Packaging, distribution, advertising expenditures and demographics are discussed in detail, with data to back up the insights provided. The industry research also covers kombucha, looks at refrigerated (RFG) RTD tea vs. shelf stable trends, tea types and flavors, the organic tea market and much more.

Among other strategics, PepsiCo has fared well enough in the value channel with Lipton, the product of its longstanding partnership with Unilever, but failed to devise a compelling strategy at the high end for the Tazo brand it long offered via its Starbucks collaboration before that collaboration was unwound. For a while, the departure of Tazo didn't matter much, because its premium entry under the Lipton brand, Pure Leaf, came on strong with a glass-bottle superpremium line called the Teahouse Collection that used real-brewed tea, subtle formulations that are less sweet or even unsweetened, and a deft cultivation of gourmet food channels. But that glass-bottle line has subsided, and the company seems to be content to simply mine the mid-tier with the core plastic-bottle Pure Leaf line.

- For his part, then Starbucks CEO Howard Schultz acquired the Teavana chain of shopping-mall tea stores and made it clear that his ambitions for that brand ran to potential RTD offerings. As things worked out, the retail component floundered as suburban shopping malls struggled, and its hundreds of stores were shut down. But the Teavana brand was used as a platform for hot and cold beverages created inside Starbucks stores and then was extended into a RTD collaboration with brewing giant Anheuser-Busch.
- The Teavana RTDs launched in 2017 and proved to be a surprisingly credible offering for a company without much successful experience in no-alcohol beverages, despite using a brand name that had failed as a tea merchant. But the company did not do a good job of seeding the brand up and down the street in its key launch market, New York, and despite line expansion with sparkling and functional extensions it never ignited. It was quietly discontinued.
- There is another major player, albeit one that tends to operate under the radar: Ito En, a Japanese giant that is mainly represented in this country by its Teas' Tea line of unsweetened teas.
- Although its unsweetened green tea offerings have long been considered to lie at the bleeding edge of what American consumers will gravitate to, there are undeniable signs that the drinks are beginning to reach a wider audience, including many of the young consumers who conventional wisdom dictates are most addicted to highly sweetened beverages. Increasingly, the brand is found in conventional grocers all over the country.
- New entries continue to arrive, including even that St. James line from the estranged co-founder of AriZona Iced Tea, one of several that are seeking to inaugurate the Tetra Pak as a packaging format in this sector.
